PERSONAL STATEMENT

- Special Equipment Operator.

WORK EXPERIENCE

Jan 2011 - Nov 2018

Van-type Transporter

Independent, Bogotá (Colombia).

- 100% on-time delivery for six consecutive months, exceeding the 95% target and guaranteeing end-customer satisfaction.
- Optimization of daily routes,resulting in a 15% reduction in fuel consumption and a 10% increase in deliveries per day, without increasing operating costs.
- Maintenance of an impeccable safety record for 5 years, with no incidents (accidents, fines, or damage to merchandise), ensuring vehicle and cargo integrity and compliance with all traffic regulations.

Production Processes Manager 0

Jan 2019 - Current position.

MIMETIC DI, Bogotá (Colombia).

- I designed and implemented a new plant layout that optimized the sequence of processes for digital printing, DTF printing, and garment assembly. This resulted in a 20% reduction in cycle time per order and a 15% increase in the area's production capacity, without the need for additional machinery investment.
- I developed and spearheaded a project to utilize leftover fabric scraps and quilts in the creation of a new line of accessory products (e.g., cleaning kits, toiletry bags, eyeglass cases). This project not only added value to waste materials but also generated an 8% increase in revenue in its first year.
- I led the implementation of the SMED (Single-Minute Exchange of Die) methodology on digital printers and DTF heat presses, standardizing design and material changeover procedures. This reduced line changeover time by 40%, increasing flexibility. for small custom orders and improving responsiveness to fluctuating demand.
- I designed and implemented a visual management system (Kanban) and digital traceability for the production order flow. This system eliminated bottlenecks by 25% and reduced print and material allocation errors by 90%, ensuring that every sportswear or quilt order was executed to the correct customer specifications.
